Hi Mark

Just a quick note following the completion of the draught proofing at Force HQ.

Despite the initial problems I would just like to say that the work has been completed to everyone's satisfaction

The response from staff is how effective the system is in reducing traffic noise and draughts. Even the Chief commented how he had to reduce the settings on the radiators in his office.

I'm particularly impressed in the way that Kevin and Sean went about their work they were very efficient, tidy and workmanlike. Whilst the notice went out to all staff to ensure that windows and cills were kept clear this was not always possible, Kevin and Sean still managed to overcome the obstacles.

There may have been a variations to the original survey namely a Fire exit door, could you please just identify this as a variation on the invoice.

Could you please advise Sheron that we are in receipt of the radiator panels.

Regards
